## Summary

Backend-focused Information Technology undergraduate building production REST APIs, distributed, event-driven microservices, and AI retrieval platforms in Go and TypeScript. CNCF contributor with experience in SQL, Kubernetes, testing, CI/CD, and scalable user-facing products.

## Education

**Indian Institute of Information Technology, Gwalior**

*B.Tech in Information Technology – CGPA: 8.00* | **Aug 2024 – Apr 2028** | *Gwalior, Madhya Pradesh*

**Relevant Coursework:** Object-Oriented Software Development, Computer Networks, Operating Systems, Memory Management.

## Work Experience

**Open Source Contributor**

*Microcks CLI (CNCF)* | *Go, Cobra, GitHub Actions* | **Feb 2026 – Present** | *Remote*

- Shipped **14 merged PRs** to CNCF Microcks CLI (1,000+ stars), adding Go commands and fixing defects via maintainer reviews.
- Cut **CI pipeline runtime by 35%** by re-architecting GitHub Actions workflows into cached, parallel cross-platform jobs.

**Software Engineer Intern**

*WiredLeap* | *Go, Next.js, React, PostgreSQL, Docker* | **Apr 2026 – Jun 2026** | *Remote*

- Delivered **20+ production CMS/CRM features** in Next.js and React, backed by Go REST APIs with JWT authentication.
- Reduced **p95 query latency by 42%** through PostgreSQL index optimizations and hardened deployments using Docker.

**Software Engineer Intern**

*TranZact* | *Vue.js, Django, Amazon RDS, Amazon SQS, Microsoft Graph API* | **Dec 2025 – Feb 2026** | *Remote*

- Automated OneDrive data extraction via Microsoft Graph API and SQS, reducing manual retrieval time by **40%**.
- Increased **test coverage by 10%** and trimmed bundle size by 18% by building reusable components and adding Vitest.

**Full Stack Intern**

*Conekt* | *React, Node.js, MongoDB* | *conektads.com* | **Aug 2025 – Nov 2025** | *Remote*

- Built and deployed a full-stack platform for managing real-time DOOH advertising campaigns using React, Node.js, and MongoDB.
- Delivered **4 production modules** covering device monitoring, campaign dashboards, secure payments, and role-based API access.

## Projects

**Kronos – Distributed Event Processing Pipeline** | *Go, gRPC, Kafka, Kubernetes* | github.com/hazelmayank/kronos

- Engineered a **distributed event pipeline** sustaining **8K+ events/sec** via gRPC ingestion and Kafka fan-out to consumers.
- Reached **99.9% delivery reliability** across 100K+ events with retry backoff, DLQ routing, Kubernetes, and Terraform.

**nmemo – AI Context Orchestration Platform** | *TypeScript, Next.js, Express, PostgreSQL, Qdrant* | github.com/hazelmayank/nmemo-ai

- Built an **open-source retrieval engine** unifying PDFs, GitHub, Slack, and Notion, cutting context-fetch latency by **30%**.
- Designed parallel retrieval, reranking, and token budgeting; shipped an Express API, OAuth, and TypeScript SDK.

**Heatgit – Local Git Contribution CLI** | *Go, Bubble Tea, Cobra, GitHub Actions* | github.com/hazelmayank/heatgit

- Built a cross-platform Go CLI scanning **500+ local repos** to render author-filtered commits as a heatmap in under 2s.
- Created an asynchronous **Bubble Tea TUI** for concurrent repo scans and automated multi-platform GitHub releases.

## Technical Skills

**Languages:** Go, TypeScript, JavaScript, C++, SQL
**Backend & Frontend:** Node.js, Express.js, Next.js, React, gRPC, Protocol Buffers, REST APIs
**Data & Messaging:** PostgreSQL, MongoDB, Prisma, Qdrant, Kafka
**Cloud, DevOps & Observability:** GCP, AWS (EC2), Docker, Kubernetes, Helm, ArgoCD, Terraform, Prometheus, Grafana, CI/CD
**AI & Security:** RAG, Vector Embeddings, Context Orchestration, OAuth, RBAC
**Testing:** Unit Testing, Functional Testing, End-to-End (E2E) Testing, Vitest
**Tools & Concepts:** Git, GitHub Actions, Distributed Systems, System Design, Concurrency, Event-Driven Architecture, Microservices, Data Structures & Algorithms
**Language Proficiency:** English (Professional Working Proficiency)

## Achievements

- Solved **550+ DSA problems** across LeetCode, Codeforces, AtCoder, GeeksforGeeks, and CodeChef.
- Achieved **1220 Codeforces** and **1500+ CodeChef rating (2 Star)**; Finalist at Hacksagon National Hackathon.
